

Individual Fieldbus nodes

CP2, CC2, CD2

New

Interface with the most widespread Fieldbus Protocols: Profibus-DP;
CANopen and DeviceNet

- » Maximum flexibility in use
- » Mounting in arduous conditions
- » Easily modifiable.

Electric output modules that can be coupled are: connection D-Sub- 37 pin for 8; 16; 24; 32 outlets or with two M12 connections for 4 outlets. Input modules have 8xM8 connections and allow the connection of sensors rated up to a max of 100mA. All communication modules are connected by plug and socket granting the maximum flexibility, and addressing is done by rotary switch for easy configuration.

The serial module CX2 can be used both integrated on different valve series (Series 3, Series H) and as external component. This device allows the connection of up to a max of 64 solenoids and 64 inputs on the base unit, so applications other than pneumatics are a possibility. Thanks to its aluminium support structure, this solution is IP65 rated with high mechanical strength. It is therefore suitable for mounting in arduous conditions.

System description

2

The principal features are: electrical connections on the same side as the pneumatic connections, Bus-In Bus-Out system for connection to the Fieldbus network, double electrical supplies, one for control and the other for power. This version is capable of handling 64 inputs and 64 outputs.

The output modules can be positioned on the right hand side of the node and they provide either 2 x M12 or 37 pole Sub-D connection. In the same way it is possible to position the input modules on the left hand side, which provide 8 inputs with M8 connection.

All the elements can be easily inserted because of their direct connection to the plate.

It is possible to use this node directly integrated on pneumatic solutions such as Series 3 and Series H.

Each node is part of the serial system.

The addressing is done via rotary switches, with the Leds indicating the working state.

Manuals and configuration files are available on our website: www.camozzi.com in the Section Products/Download.

Digital output module (D-SUB - 37 pin) Mod. ME-xxxx-DD

Digital output module 2xM12 DUO, (4 outputs), Mod. ME-0004-DL

New

	ME-0004-DL
Number of digital outputs	4
Connection	M 12 5 Poles Duo
Number of connections	2 Female connectors M 12
Dimensions	130 x 25
Signalling	1 Yellow Led for each single outlet 1 Green Led for power supply presence on the module
Outlet voltage	24 V DC +/- 10%
Signal	24 V DC PNP
Protection	Overload - Supply voltage (150 mA)
Power consumption without load	10 mA
Protection class	IP 65
Temperature	0°C ÷ 50 °C
Material	Aluminium
Weight	100 g

Digital input Module Mod. ME-0800-DC (8 digital inputs)

New

Number of digital inputs	8
Connection	M8 - 3pin
Module dimension	130x25 mm
Signalling led	yellow led for each inlet
Sensors supply	24VDC +/- 10%
Protection	overloaded (400 mA every 4 sensors)
Power consumption of the module without load	10 mA
Type of signal	PNP
Protection class	IP65
Operating temperature	0-50°C
Material	Aluminium
Weight	110 g
